Muhammad **Abdur Rofi** Maulidin

I am someone who is excited to solve problems with creating some automation or something like that to make some process more seamless.

Working Experience

DevOps Engineer   **MTARGET**   **April 2022 - Now**

Semarang, Indonesia

Focus in Infrastructure Management, Service Troubleshooting, Observability Monitoring, and Cloud Cost Optimization.

- **Infrastructure Management:** Seamlessly set up and managed Kubernetes clusters, leveraging Infrastructure as Code (IaC) to streamlined infrastructure provisioning and configuration.
- **Troubleshoot:** Empowered development teams with comprehensive application troubleshooting and support, ensuring unparalleled reliability and efficiency, fostering a collaborative environment for rapid application development and deployment.
- **Observability:** Implemented observability monitoring to provide real-time monitoring and alerting, ensuring proactive identification and resolution of performance bottlenecks and potential issues.
- **Cost Optimization:** Optimized cloud costs by meticulously fine-tuning application resource allocation, ensuring efficient resource utilization.

DevOps Engineer Internship   **MTARGET**   **Augustus 2021 - February 2022**

Semarang, Indonesia

Focus to learn DevOps Fundamental and DevOps Tools.

- **Culture:** Learn about DevOps culture and company culture, like a DRY concept (Don't Repeat Yourself) to increase efficiency in the development process.
- **Tools:** Focus on GNU Linux, web server, Load Balancing for high availability, infrastructure automation, containerization, and container orchestration.

Education

Universitas Islam Negeri Walisongo - B.Sc, Semarang, Indonesia   **Augustus 2019 - June 2023**
Majority: Information Technology
GPA: 3.9

Skills

Languages: Python, Javascript, Go, PHP.
Technologies: NEXT.js, GitHub, NGINX, Kubernetes, Docker, Terraform, eksctl, bash.
